# CISA

In the year 1926 CISA brand was established, it patented the very first electrically controlled lock in the world, revolutionising the principle of opening and closing doors and gates. Nearly a century later, CISA continues to innovate and lead the market, developing numerous patents which have made it a world leader in the security industry.

Since 1944, the company has had its headquarters in Faenza, Emilia-Romagna, a region in Italy with a long history of mechanical engineering, a very specialised production chain and a high level of technical expertise. Here, where tradition meets innovation and talent, CISA develops products that make homes, workplaces and leisure facilities around the globe safer.
