# CONNECT KEY CLAMPS

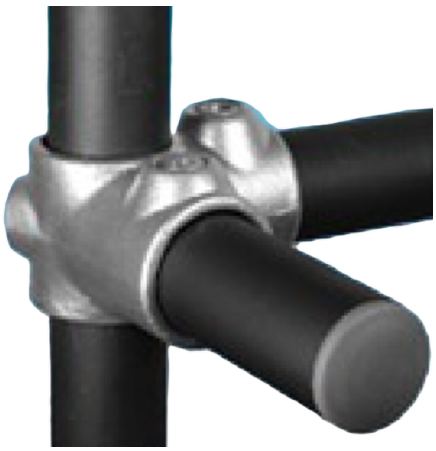

Our range of key clamps are made of malleable iron castings which are free of sharp edges. All fittings are galvanized by hot dipped galvanized to high specification and finish

Discover how easy it is to build strong structures such as railings, storage racks, work benches, outdoor shelters, boat docks, lighting grids, store fixtures, playground equipment, awning frames, solar panel frames and countless other applications using  key clamps

The advantage of Key clamps is that no welding, threading, drilling or bolting is required for assembly. Our slip-on pipe connections are quick, strong and permanent, yet they can be instantly dismantled. Both the slip-on pipe used and all key clamps are 100% reusable for other applications again and again

Building contractors, plant operators and equipment manufacturers can save up to 70% on labor costs by using key clamps. A tape measure, pipe cutter and hex wrench are the basic tools needed for fabrication. Our key clamps (often called railing clamps) are great for building safety guardrails, safety barriers, safety railings, machine guardrails, playgrounds, handrails, platforms, railings for walkways, store fixtures, awnings for stores, awnings for commercial buildings, machinery guardrails, storage cages, walkways, furniture, store fixtures, playground structures, construction safety barriers, and all types of guardrailing.
