DUST BUBBLE

DustBubbles are disposable dust collectors for DIY or industrial drills up to a maximum bit size of 10mm. They use a combination of adhesion to the wall and the action of the drill itself to catch virtually all the dust when you drill. They make drilling jobs easier, leaving both hands free while you drill and quicker, by saving you the trouble of clearing up afterwards. When you've finished drilling you simply remove the DustBubble from the wall and discard it along with all the dust.
